SUPPLY CHAIN MANAGEMENT

Fundamental and Support Elements

Monograph

**edited by
Virgil Popa & Marta Starostka-Patyk**

Częstochowa 2013

REVIEWERS:

Theodor Valentin Purcărea

Professor dr. at the Romanian-American University, Romania
President of the Executive College of SSMAR (Romanian Scientific Society of Management)

Gheorghe Gh. Ionescu

Professor dr. hc.hc.hc. at the West University from Timișoara, Romania
Ex. 1st President of SAMRO (Romanian Academic Society of Management)

Janusz Krzysztof Grabara

Professor dr h.c. dr eng. at Czestochowa University of Technology
Faculty of Management, Institute of Econometrics and Informatics

TECHNICAL EDITOR

Marcin Pilarski

COVER DESIGN

Jakub Kokoszczyk

Overview

Foreword	XIII
-----------------------	------

Preface	XV
----------------------	----

Chapter 1

Sebastian Kot

Main Issues of Supply Chain Management	1
1.1. Conception of Supply Chain Management	1
1.2. Strategy and Activity of Enterprises in Supply Chain Management	7
1.3. Theoretical Development of Supply Chain Management	12

Chapter 2

Marta Starostka-Patyk

Network Solutions and Bullwhip Effect in Supply Chains	18
2.1. Basic Information On Network Solutions	18
2.2. Bullwhip Effect	20
2.3. Possibilities of Bullwhip Effect Reduction	23
2.4. Partners Integration as the Key in Networks Relations	25
2.5. Systems Supporting the Networks Creation and Development	27
2.6. Networks Creation and Development	27

Chapter 3

Virgil Popa

Collaborative Business Process Management	30
3. 1. Collaborative Business Management	30
3. 2. Supply Chain Excellence through Practicing Collaborative Business Process Standards	36
3.3. The Management of SCM Processes Using the SCOR Model	45
3.4. The Redesign of Logistic Chain Processes	59
3.5. Continuous Replenishment (CRP) and logistic chain management	68

Chapter 4

Sebastian Kot, Beata Ślusarczyk, Marta Starostka-Patyk

Information Systems Supporting Cooperation in Supply Chains	78
4.1. Relations and Cooperation in Supply Chains	78
4.2. Informatics Technologies in Supply Chains	82
4.3. Strategic Support for IT Systems in Supply Chains	87

Chapter 5

Paula Bajdor

The Sustainable Development Conception

in Supply Chain Management	91
5.1. The Essence of Sustainable Development Conception.....	91
5.2. Sustainable Development Elements in Supply Chain Management.....	96
5.3. Transport and Supply as the Integral Parts of Supply Chain Management	100
5.4. Identification of Sustainable Development Elements in the Processes of Transport and Supply.....	105

Chapter 6

Virgil Popa

Strategic Alignment in Supply Chain	112
6.1. Strategic Alignment of Service Providers (3PL – Third Part Logistics)	112
6.2. Techniques and Tools in Logistics Services.....	119
6.3. Collaborative Project for New Product Development. Case Study	123

Chapter 7

Virgil Popa

Global Standards and Managerial Instruments in SCM

in Consumer Goods and Retail Industry	143
7.1. Radio Frequency Identification (RFID) and Electronic Product Code (EPC) in Supply Chain Management	143
7.2. Information Alignment in SCM Through Standards Global Data Synchronization (GDS)and EPC Global	154
7.3. Collaborative Planning, Forecasting and Replenishment (CPFR)	170

Chapter 8

Marta Starostka-Patyk

General Aspects of Reverse Logistics	181
8.1. Theoretical Framework for Reverse Logistics Concept	181
8.2. Reverse Logistics Main Processes	184
8.3. Closed and Open Loops in Reverse Logistics	188
8.4. Place of Reverse Logistics in Sustainable Development	188
8.5. Reverse Logistics in Companies Practice for Environmental Management and Protection	191
8.6. Barriers to Reverse Logistics Implementation in Companies Practice	195

Chapter 9

Virgil Popa

Performance Management of Collaboration in Supply Chain	201
9.1. Supply Chain Performance and Strategic Collaborative Management through Balanced Scorecard. Case Study	201
9.2. Performance Dashboard - a Piloting Tool of a SC Processes. Case Study	210
9.3. Measuring the Alliance Performance Between Two Organizations to Promote a Fast Moving Consumer Goods (FMCG). Case Study	215
9.4. Performance Management of Supply Chain Using Balanced Scorecard in Nonprofit Organizations	219

Chapter 10

Virgil Popa, Mădălina Barna

New Direction in SCM in The New Economy	231
10.1. Collaborative Business for Value Chain Management	231
10.2. Corporate Social Responsibility (CSR) in Collaborative Supply Chain of Consumer Goods Industry and Retail	236
10.3. The Financial Supply Chain Management (FSCM): a Response to the New Economy	241

Appendices	254
-------------------------	-----

Index	267
--------------------	-----

Contents

Foreword	XIII
Preface	XV
Chapter 1	
<i>Sebastian Kot</i>	
Main Issues of Supply Chain Management	1
1.1. Conception of Supply Chain Management	1
1.2. Strategy and Activity of Enterprises in Supply Chain Management	7
1.3. Theoretical Development of Supply Chain Management	12
Chapter 2	
<i>Marta Starostka-Patyk</i>	
Network Solutions and Bullwhip Effect in Supply Chains	18
2.1. Basic Information On Network Solutions	18
2.2. Bullwhip Effect	20
2.3. Possibilities of Bullwhip Effect Reduction	23
2.4. Partners Integration as the Key in Networks Relations	25
2.5. Systems Supporting the Networks Creation and Development	27
2.6. Networks Creation and Development	27
Chapter 3	
<i>Virgil Popa</i>	
Collaborative Business Process Management	30
3. 1. Collaborative Business Management	30
3.1.1. Collaborative Excellence - Improved Productivity and Growth	33
3.1.2. Collaborative Management Based on Data from POS (Point of Sale)	33
3.1.3. JAG (Jointly Agreed Growth) model of collaborative growth	34
3. 2. Supply Chain Excellence through Practicing Collaborative Business Process Standards	36
3.2.1. Collaborative Management	36
3.2.2. SCM 4 ECR. Supply Chain Management for Efficient Consumer Response	38
3.2.3. Through Business process Improvement to Business Process Management	39
3.2.4. The Redesign Process Project	41
3.3. The Management of SCM Processes Using the SCOR Model	45
3.3.1. Description	45
3.3.2. SCOR Model Structure	47

3.3.3. Performance Attributes and Level Indicators	48
3.4. The Redesign of Logistic Chain Processes	59
3.4.1. Proactive Action with Selected Clients	60
3.4.2. The Advanced Partnership can be Made Using Some Techniques	60
3.4.3. Experiencing a Complete Supply Chain	61
3.4.4. The APQC Process Classification Framework	64
3.5. Continuous Replenishment (CRP) and logistic chain management	68
3.5.1. Changing Relationship between Trading Partners	68
3.5.2. ECR Processes	69
3.5.3. Continuous Replenishment	71

Chapter 4

Sebastian Kot, Beata Ślusarczyk, Marta Starostka-Patyk

Information Systems Supporting Cooperation

in Supply Chains	78
4.1. Relations and Cooperation in Supply Chains	78
4.2. Informatics Technologies in Supply Chains	82
4.3. Strategic Support for IT Systems in Supply Chains	87

Chapter 5

Paula Bajdor

The Sustainable Development Conception

in Supply Chain Management	91
5.1. The Essence of Sustainable Development Conception	91
5.2. Sustainable Development Elements in Supply Chain Management	96
5.3. Transport and Supply as the Integral Parts of Supply Chain Management	100
5.4. Identification of Sustainable Development Elements in the Processes of Transport and Supply	105

Chapter 6

Virgil Popa

Strategic Alignment in Supply Chain	112
6.1. Strategic Alignment of Service Providers (3PL – Third Part Logistics)	112
6.1.1. Transport and Logistics in Europe	112
6.1.2. ECR Europe Projects	113
6.1.3. Sustainable Transport Challenges to Overcome	114
6.1.4. Transport Optimization Guidelines	115
6.1.5. The ECR Model for Sustainable Transport Road Map	117

6.1.6. ECR Europe Project on “Sustainable Transport – Working Together to Deliver to Consumers Whilst Minimizing Environmental Impact	118
6.2. Techniques and Tools in Logistics Services	119
6.2.1. Techniques and Enablers	119
6.2.2. Efficient Unit Loads	121
6.2.3. Unit Load Identification and Tracking (ULIT)	122
6.3. Collaborative Project for New Product Development. Case Study	123
6.3.1. Introduction	123
6.3.2. New Concept Development Model	124
6.3.3. Developed, collect and screen ideas	127
6.3.4. New Product Introduction (NPI) in food industry	127
6.3.5. Managing The NPI Forecasting & Planning Process: Current Practices	128
6.3.6. Internal and external NPI collaboration	129
6.3.7. Involvement of supply chain management	130
6.3.8. Money being lost on new product introductions	134
6.3.9. The long-term value argument	135
6.3.10. Global Commerce Initiative	136
6.3.11. NPI Process Management Project – The Engineer-to-Order Process (SCOR Model)	138

Chapter 7

Virgil Popa

Global Standards and Managerial Instruments in SCM

in Consumer Goods and Retail Industry	143
7.1. Radio Frequency Identification (RFID) and Electronic Product Code (EPC) in Supply Chain Management	143
7.1.1. Introduction	143
7.1.2. The Technology of RFID	143
7.1.3. The RFID Technology	144
7.1.4. Examples Of RFID Applications	144
7.1.5. The Supply Chains of Today	145
7.1.6. Electronic Product Code (EPC)	146
7.1.7. The Benefits of EPC for the Modern Supply Chain	146
7.1.8. The Potential Benefits of EPC for the Modern Supply Chain	146
7.1.9. Considerations for EPC Adoption	147

7.1.10. RFID-based EPC will Fail in Supply Chains Built on Inaccurate Data	147
7.1.11. A free Flow of Goods	151
7.1.12. The EPC Network	152
7.2. Information Alignment in SCM Through Standards Global	
Data Synchronization (GDS)and EPC Global	154
7.2.1. Introduction	154
7.2.2. Overview of Global Data Synchronization (GDS)	
7.2.3. Master Data Synchronization	157
7.2.4. Global Upstream Supply Initiative (GUSI)	158
7.2.5. Business Rationale	158
7.2.6. Integrated Suppliers	159
7.2.7. Case for Using Existing GS1 Item and Location Coding Standards	159
7.2.8. The Upstream Integration Model (UIM)	160
7.2.9. An Integrated View of the Global Data Synchronization Network with Electronic Product Code Network	160
7.2.10. Creating the Business Case for Global Data Synchronization in the Company	162
7.2.11. Global Trade Item Number (GTIN) Definition	163
7.2.12. An Introduction to the Serial Shipping Container Code	163
7.2.13. CPG Company Best Practices (Nestlé)	165
7.3. Collaborative Planning, Forecasting and Replenishment (CPFR)	170
7.3.1. Defining CPFR	170
7.3.2. Key Requirements for Collaboration	172
7.3.3. Analysis of Existing Processes	173
7.3.4. Main Gaps that Persist through Current Practice of Forecasting and Planning	174
7.3.5. Opportunities That Arise Through CPFR	175
7.3.6. Other benefits of CPFR	175
7.3.7. The CPFR Process	176

Chapter 8

Marta Starostka-Patyk

General aspects of reverse logistics	181
8.1. Theoretical Framework for Reverse Logistics Concept	181
8.2. Reverse Logistics Main Processes	184
8.3. Closed and Open Loops in Reverse Logistics	188

8.4. Place of Reverse Logistics in Sustainable Development	188
8.5. Reverse Logistics in Companies Practice for Environmental Management and Protection	191
8.6. Barriers to Reverse Logistics Implementation in Companies Practice	195

Chapter 9

Virgil Popa

Performance Management of Collaboration

in Supply Chain	201
9.1. Supply Chain Performance and Strategic Collaborative Management through Balanced Scorecard. Case Study	201
9.1.1. Introduction	201
9.1.2. ECR Europe Studies Regarding Alliance Performances	203
9.1.3. The Collaborative Management of ECR Alliance	204
9.2. Performance Dashboard - a Piloting Tool of a SC Processes. Case Study	210
9.2.1. Managing and Measuring the Performance of Supply Chain Processes	210
9.2.2. The Five Major Processes of a High Performance Supply Chain	210
9.2.3. Performance Dashboard - a Piloting Tool of a SC Processes. Case Study	211
9.2.4. The Logistic Chain of SC. ILDTA SA	212
9.2.5. Piloting the Supply Chain of S.C. ILDTA SA using the Balanced Scorecard	213
9.3. Measuring the Alliance Performance Between Two Organizations to Promote a Fast Moving Consumer Goods (FMCG). Case Study	215
9.3.1. Manufacturer/Distributor-Retailer Alliance Performance Measurement	215
9.3.2. Development of the Process for Measuring Sales Promotion Performance	215
9.3.3. Defining Key Performance Indicators (KPI) of the Impact of Promotion	216
9.3.4. The Common Workflow for Entry-Level Scorecard and KPI	216
9.3.5. Promotion Optimization	216
9.3.6. Case Study	218
9.4. Performance Management of Supply Chain Using Balanced Scorecard in Nonprofit Organizations	219
9.4.1. Supply Chain in NGOs	219

9.4.2. Supply Chain Measures for a Nonprofit Organization	222
9.4.3. The Balanced Scorecard (BSC)	222
9.4.4. Example. A nonprofit Organization that Adopted Balanced Scorecard	227
9.4.5. Implementing a Performance Management System	228

Chapter 10

Virgil Popa, Mădălina Barna

New Direction in SCM in The New Economy	231
10.1. Collaborative Business for Value Chain Management	231
10.1.1. A New Model for Enhanced Collaboration	232
10.1.2. The Consumer Centric	234
10.1.3. Best practices for New Generation SCM Model	235
10.2. Corporate Social Responsibility (CSR) in Collaborative Supply Chain of Consumer Goods Industry and Retail	236
10.2.1. Introduction	236
10.2.2. Social Responsibility in Supply Chain Management	236
10.2.3. CSR in Supply Chain	237
10.2.4. Global Projects in SCM	239
10.2.5. CSR in the Supermarkets	240
10.3. The Financial Supply Chain Management (FSCM): a Response to the New Economy	241
10.3.1. Financial Supply Chain Management (FSCM)	
10.3.2. Supply Chain Finance	247
10.3.3. Working Capital Management	248
10.3.4. A New Financial Solution: Factoring and Reverse Factoring vs. Commercial Credit	250
10.3.5. Good Practices in Romania and Community Acquis	252
Appendices	254
Index	267
